

Hygiene concept to protect against COVID-19 in the Berghof retreat house

Status 07/2022

For the safety of our guests and employees, our hygiene concept - following the recommendations of the Bavarian state government and, if necessary, deviating from statutory rules - also provides for the following measures:

- **Anyone who has symptoms of a flu infection at the beginning of a course is not allowed to take part in the course and should please stay at home. Seminar fees will then not be charged.**
- **In the current situation, an official daily negative corona antigen rapid test on arrival is still a prerequisite for course participation for the protection of our teachers and endangered course participants.**
- If a test center is not available, this can be performed on site in the presence of a trained employee. For this purpose, you can either bring your own rapid tests or purchase them from us at cost price.
- The arrival test is sufficient for weekend events. For longer courses, it should be repeated every 48 hours as a self-test.
- **The mask requirement (medical or FFP2) in the indoor area remains in place.**
- The mask can be removed at the seat if the room is sufficiently ventilated and social distancing is maintained. Masks are not required in the well-ventilated tent.
- We point out distance, hand and general hygiene.
- If possible, please bring bed linen and blankets for your own use.
- All participants undertake to inform us immediately in the event of an infection occurring at the beginning or during the event, to isolate themselves from the other participants and to organize the journey home immediately.

If the incidence of infection increases and there are possible individual requirements due to the size, composition and course of an event, the measures may be modified and adjusted if necessary.
